Application/Control Number: 09/905,561 Page 2

Art Unit: 2881

### **DETAILED ACTION**

# Election/Restrictions

 The election requirement mailed on 7-1-03 is withdrawn upon further consideration.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat No 6,543,044 issued to Inanami et al and US Pat No 5,995,878 issued to Miyajima.
- 3. The recitation that an element is "configured to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense.
- 4. As per claims 1,7,9, 13, 23,27 and 31, Inanami et al disclose pattern generation system (col.4, lines 2-12).

- Art Offit. 2001
- Inanami et al disclose a data generation subsystem to generate and assert a set of hierarchical image data having at least three levels of hierarchy (col.2, line 65-col.3, line 12).
- Inanami et al disclose the hierarchical image data includes residual data (i.e. remaining non-repetitive data) and a set of cells (col.7, lines 15-35; col.8, lines 41-58).
- 7. Inanami et al does not disclose a graphics engine. However, Miyajima teaches a graphic engine (col.4, lines 56-65).
- 8. It would have been obvious to an ordinary artisan to incorporate the teachings of Miyajima into Inanami et al since Miyajima teaches the advantage of reduction of processing time (col.2, lines 48-52).
- Miyajima teaches the combination of data from the graphic engine and layout memory to generate beam control data (col.5. lines 1-14).
- 10. As per claims 2, 8, 10, 14, 24,28 and 32, Inanami et al teaches pixel (i.e. shot) format (col.10, line 65-col.11, line 5).
- 11. As per claims 3, 11, 25,29 and 33, Inanami et al teaches the generation of beam control data for imaging a pattern on the target (col.1, lines 13-58).

Art Unit: 2881

- 12. As per claims 4, 12, 26,30, and 34, Miyajima teaches a raster engine (i.e. x-y scanning) (col.1, lines 21-46).
- 13. As per claims 5-6 and 15-22, Inanami et al teaches hierarchy classification software (see fig. 4a; col.14, lines 11-25). In addition, Inanami et al teaches a size classification (col.8, lines 1-28). The process limitations recited in claims 15-22 cannot impart patentability to the processor since the process steps fall within the level of ordinary skill in the art and the addition/omission of the process step are operator specific. Namely, Inanami et al teaches software that processes hierarchical image data by classification. The recited limitations are obvious variation of Inanami's software since it merely requires graphical representation wherein an ordinary artisan would have obvious knowledge to affect this modification if he was so obviously motivated.

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Pat No 5,159,201 issued to Frei; US Pat No 6,047,116 issued to Murakami et al; US Pat No 6,189,135 issued to Chisaka; and US Pat No 6,415,432 issued to Saito et al are considered

relevant to the claimed invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kalimah Fernandez whose telephone number is 703-305-6310. The examiner can normally be reached on Mon-Thurs between 7:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R Lee can be reached on 703-308-4116. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9318.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
